litres per km	0.392156863	0.102354145	0.068965517
Cost per litre	\$1.60	\$1.60	\$1.45
Cost per Km	\$0.63	\$0.16	\$0.10
Breakdown by km**	\$0.30	\$0.20	\$0.15

Note **Used on emergency basis, In the event of a breakdown while on the road. .

1. Road Captains have been assigned provincially. Registration forms have to be physically verified by the road captain that the person named on the form is who they say they are and that the registration papers identify the vehicle being driven.
2. The trucker is to submit to the finance committee a copy of registration (this will be proof for the starting point eg Vancouver)
 - They are then to keep all original fuel receipts for the trip and submit them to finance committee. (This will show proof of travel eg the receipts will identify locations of fuelling from province to province as they travel thus creating a road map from Vancouver to Ottawa)
3. After all the above information is received by the financial committee, then calculation of disbursement of fund would look like Vancouver – Ottawa (distance using google map) = 4371 km x .63 = \$2753.73
4. \$2753.73 would be e-transferred to the trucker using email they provided on their registration form.
